Honorlock Sideview camera

Android phone as external camera on Windows 11 OS

Resources:
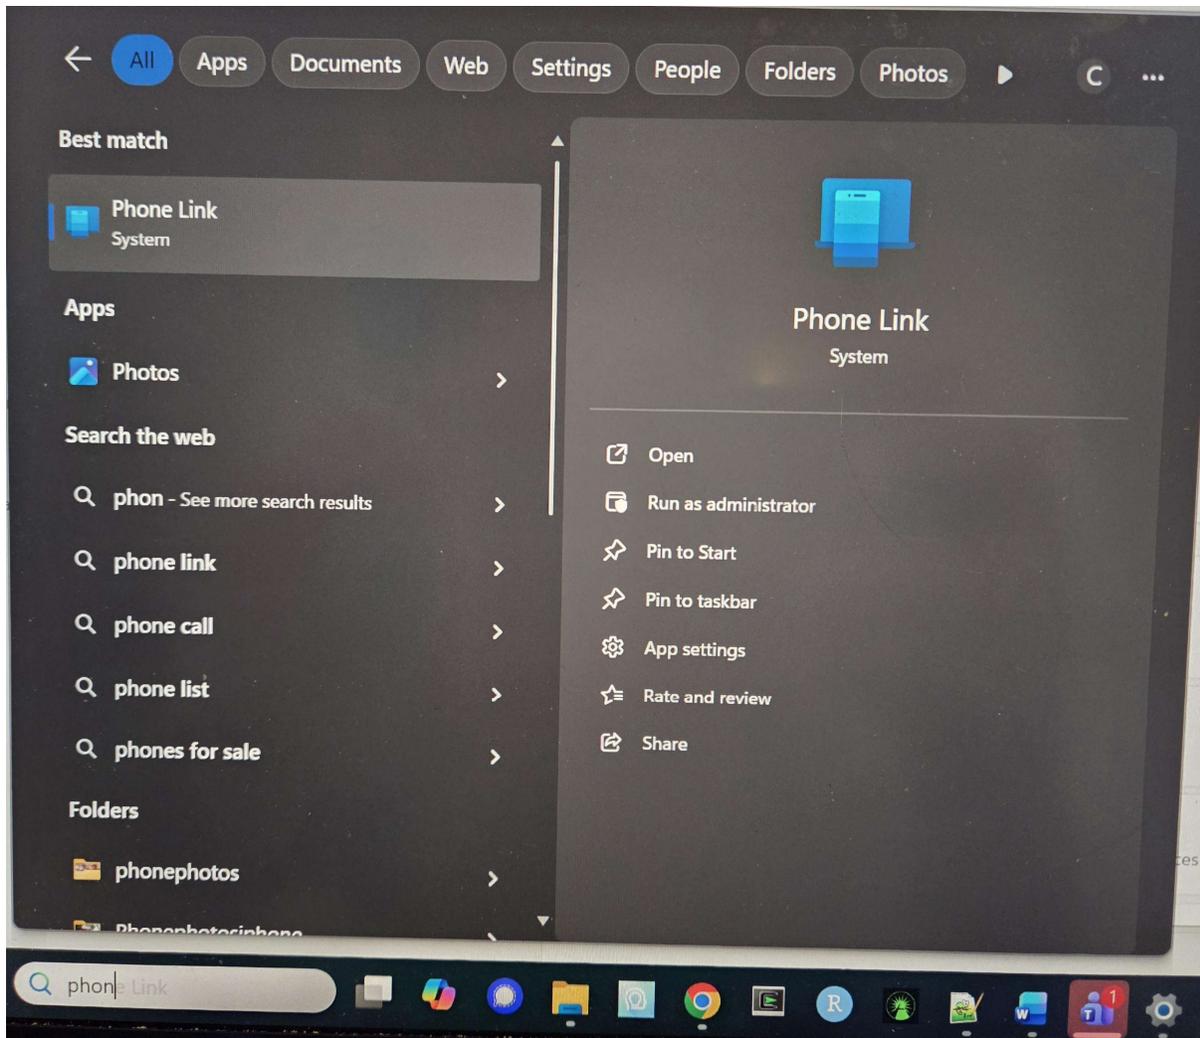

https://honorlock.kb.help/setting-up-a-side-angle-camera/

https://techcommunity.microsoft.com/discussions/windows11/how-to-use-your-phone-as-webcam-in-windows-11-brand-new-feature/4115488
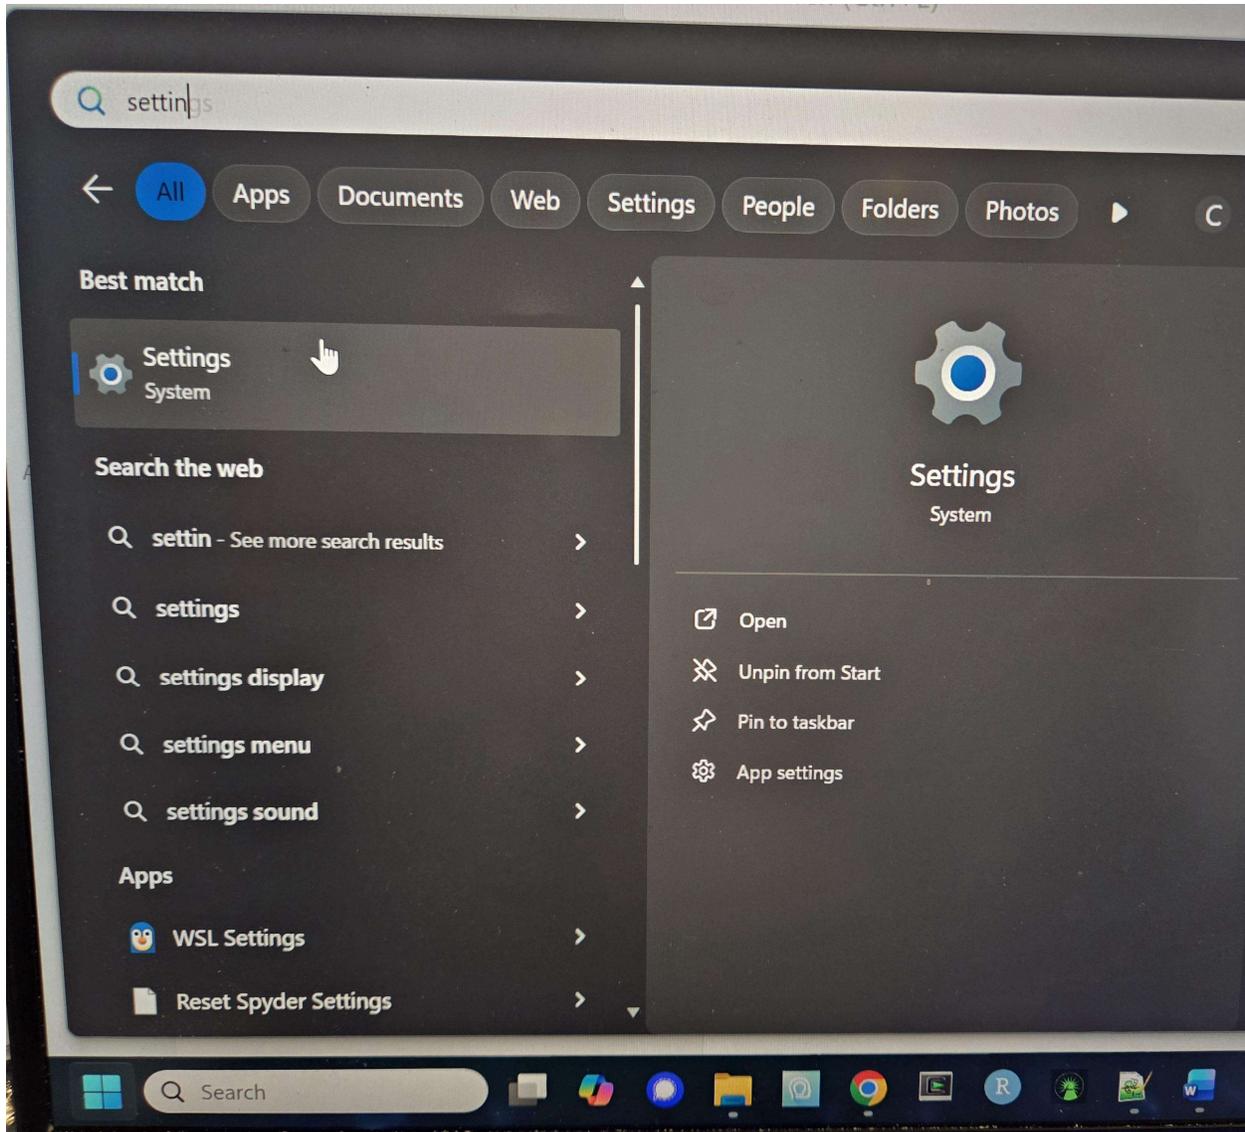

https://blogs.windows.com/windows-insider/2024/02/29/ability-to-use-a-mobile-devices-camera-as-a-webcam-on-your-pc-begins-rolling-out-to-windows-insiders/
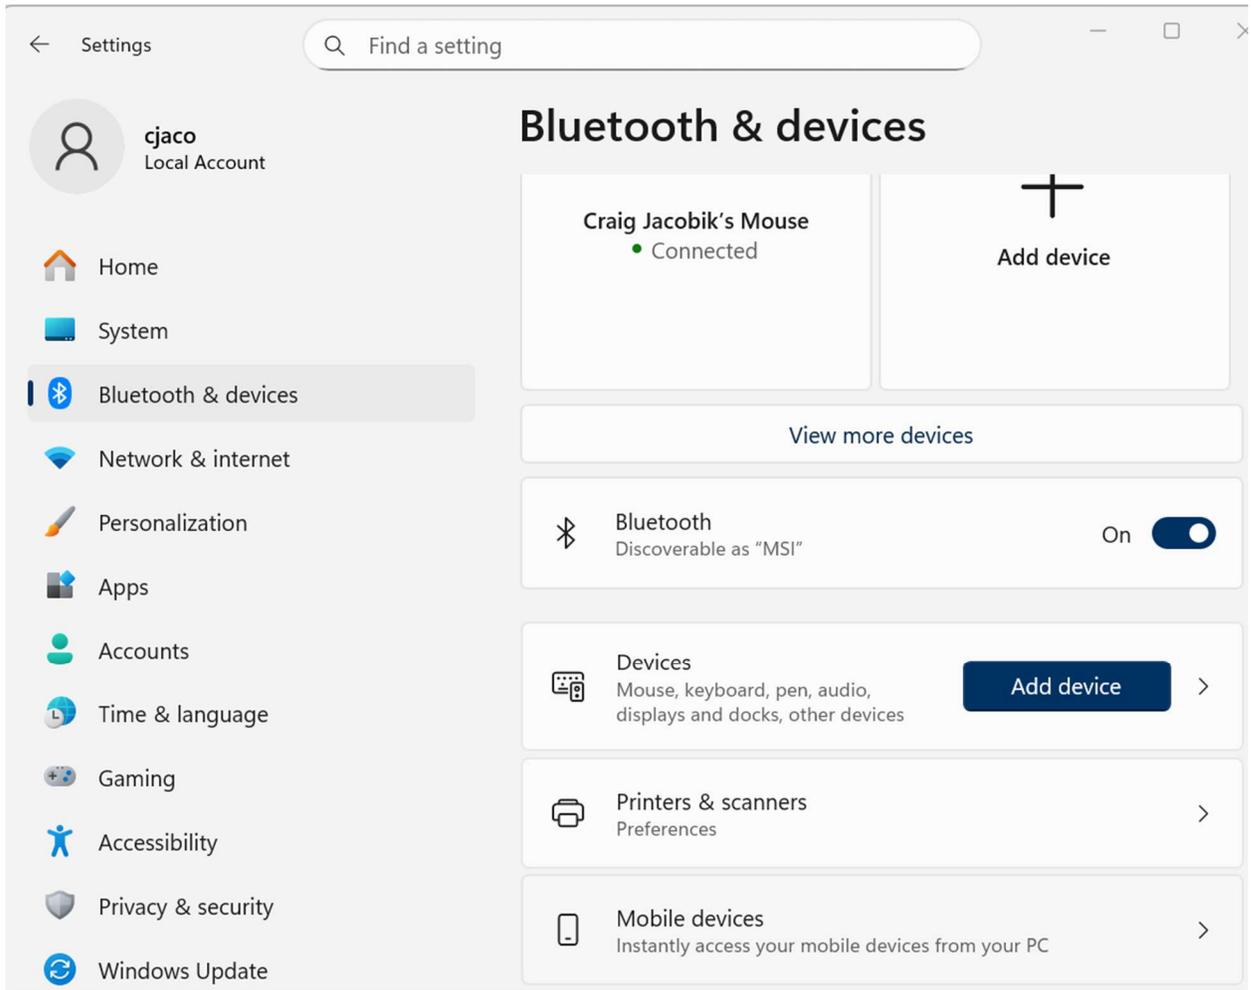

Procedure:

1. On a phone, open "Link to Windows" app on Android. Log into your Microsoft account (needs to be a personal one and not a student/work one)
2. On a computer, open "Phone Link" app in Windows. Log into the same Microsoft account
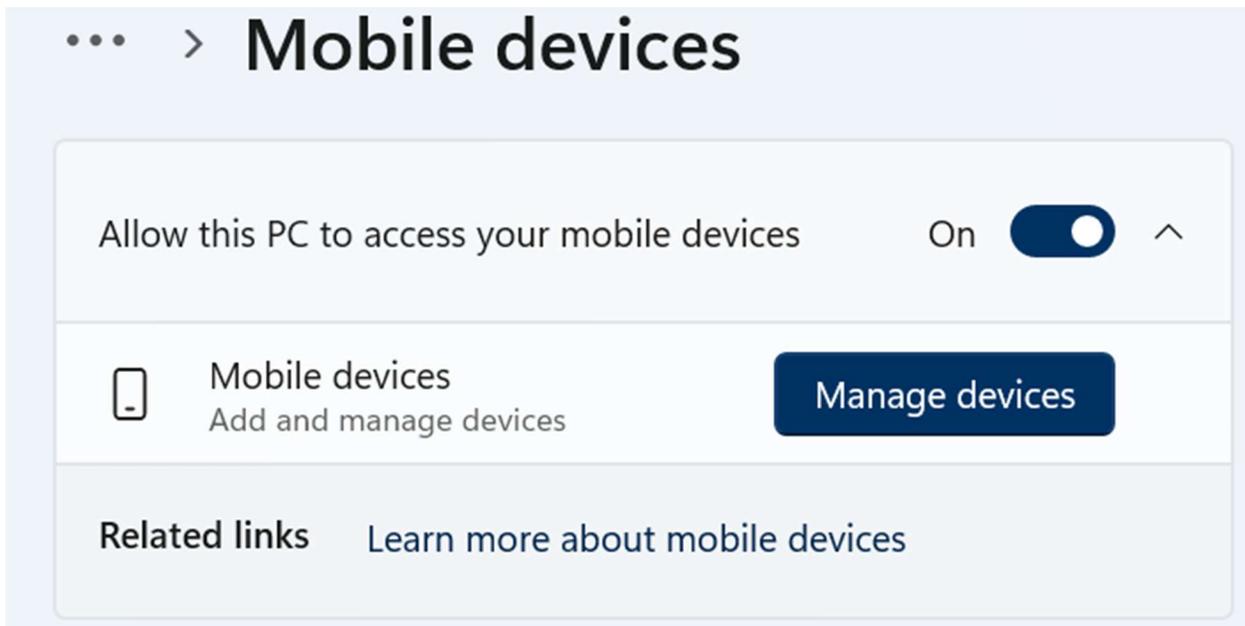

3. Open Windows search bar and find system "Settings"

4. On the left side, select "Bluetooth & devices". Then, on the resulting window on the right side, select "Mobile devices", specifically the ">".

5. Click Manage Devices

6. Make sure that the device is enabled. Disable all of the options except make sure that "Use as a connected camera" is enabled.

7. Start Honorlock as you normally would. When you get to the camera/"Face Detection" screen, you need to change your camera from your integrated laptop camera to your phone's camera.
   a. Your phone camera must be unlocked for the duration of the exam
   b. We recommend plugging it in to ensure sufficient battery life.
